

12kWh – 2MWh

HYBRID POWER SUPPLY

Hybrid Power Supply solutions from **API** provide an uninterrupted power supply for residential, commercial, and industrial use. Integrated circuits extract power from AC and DC sources and store the power in Lithium-Ion technology. A powerful off-grid inverter provides power to the most demanding loads.

Our STR series is scalable to multi-MWs providing 24/7 power. They can be used to power anything from small houses to large commercial and industrial complexes.

FEATURES	BENEFITS
Lithium-Ion storage	Small footprint; Use less space High cycle time (3000+ cycles) No discharge memory issues Fast recharge No standby storage leak Long warranty
Hybrid functionality	Charge from Solar power or Wind power Charge form AC grid or Diesel generator
Split Phase Inverter	Usable Worldwide – 120/240Vac
Fan less operation for 24/7 usage	No noise; No maintenance
Scalable	12kWh – 2MWh capacity 10kVA – 350kVA output
Grid output connection	Feed excess power back to the grid with an external grid-tie inverter
Fully integrated	Plug and Use; Install in 10 minutes

Auxin Solar STR is GREAT for:

- Rural Electrification
- Island Use
- Military Use
- Uninterrupted power for industrial use
- Optimization of green energy
- Load balancing
- Telecom
- Hotels and Resorts
- Schools
- Multi-unit housing
- Micro grids

Install and use in 10 minutes!
